

AI ASSISTED CODING – 1

NAME : NAVYA

HALLTICKET.NO : 2403A51308

BATCH.NO : 01

YEAR AND SEM : 2ND AND 3RD

Task Description#2

>>use copilot to generate a `is_prime()` python function

Expected output#2

>>function to check primality with correct input

PROMPT:

>>Develop a python program to check a number prime or not

The screenshot shows the Visual Studio Code editor with a Python file named `AI ASSISTED CODE.py`. The code generated by Copilot is as follows:

```
1 def is_prime(n):
2     if n <= 1:
3         return False
4     for i in range(2, int(n ** 0.5) + 1):
5         if n % i == 0:
6             return False
7     return True
8
9 num = int(input("Enter a number: "))
10 if is_prime(num):
11     print(f"{num} is a prime number.")
12 else:
13     print(f"{num} is not a prime number.")
```

The terminal output shows the execution of the program:

```
PS C:\Users\jasmi\OneDrive\Desktop\AI assisted code> & 'c:\Users\jasmi\AppData\Local\Microsoft\WindowsApps\python3.11.exe' 'c:\Users\jasmi\vscode\extensions\ms-python.debugpy-2025.10.0-win32-x64\bundle\libs\debugpy\launcher' '56048' '-.' 'c:\Users\jasmi\OneDrive\Desktop\AI assisted code\AI ASSISTED CODE.py'
Enter a number: 5
5 is a prime number.
PS C:\Users\jasmi\OneDrive\Desktop\AI assisted code>
```

The interface also includes a sidebar with 'VARIABLES', 'WATCH', 'CALL STACK', and 'BREAKPOINTS' sections, and a right-hand panel with the 'Ask Copilot' chat interface.

Task Description#3

>>write a comment like#function to reverse a string and use copilot to generate a function

Expected output#3

auto completed function

PROMPT:

Develop a python code to generate a comment like#function to reverse a string

Task Description#4

>>Generate both recursive and iterative versions of a factorial functions using comments

Expected output#4

>>two working factorial implementation

PROMPT:

develop a python program to generate both recursive and iterative versions of a factorial functions using functions

Task Description#5

>>use copilot to find the largest number in a list

assess code quality and efficiency

Expected output#5

a valid function with your review

PROMPT:

>>Develop a python program to find largest number in a list assess code quality and efficiency
